

Dimdim Web Meeting

World's free, open source web meeting

"Dimdim worked so well in my tests that I can't imagine paying for a service like WebEx again."

- PCWorld

"Challenging big, entrenched, expensive products with new, leaner products and much more palatable pricing models."

- WebWare

"Big company? Cut your Webex bills by 50% or more..."

- ReadWriteWeb

"...solutions that remain islands, developed and deployed by one company, are much less interesting than open-source solutions that are developed and deployed by a community."

- CNet

Dimdim is the free web conferencing service where you can share your desktop, show slides, collaborate, chat, talk and broadcast via webcam with **no download required**. Dimdim is 100% browser-based and is *your* easy, open and affordable web meeting solution.

Incredibly Easy. Dimdim sports a very simple user interface so you can focus on your meetings - not the technology. What's more, the people you invite to your meeting do not have to install anything - even to broadcast audio or video. A single click starts your meetings.

Totally Open. You can download our open source version, extend Dimdim via open APIs and choose hosted or onsite versions to suit your needs.

Absolutely Free. Our free version isn't a feature-limited trial. Dimdim Free boasts a powerful feature set allowing anyone, anywhere to host meetings with up to 20 people. Dimdim Pro and Enterprise do more.

Amazingly Flexible. Dimdim is available in commercial enterprise editions capable of supporting thousands of attendees. You can choose onsite (you install it on your servers) and hosted (we install it on ours) configurations. And only Dimdim is available as open source under a GPL license.

Grows with you. Need more than 20 people in one room or multiple rooms? Dimdim Pro can scale to 100 people starting at only \$99 per year! Dimdim Enterprise is limited only by the speed of your Internet connection and costs less than a third what you used to pay for Webex.

This changes things. With Dimdim, people and organizations everywhere who could never afford (or figure out how) to get together online can now meet freely.

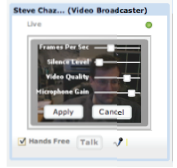

Dimdim Web Meeting Features

Share Anything. A single click is all it takes to share PowerPoints, PDFs, whiteboards, even your entire desktop. Another click is all it takes to pass control of the meeting to any attendee.

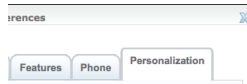

See and Hear Everything. See the presenter's live video and desktop while hearing multiple voices over IP (VoIP). Hosts can pass the mic or webcam* around with a single click and adjust video quality. All with no plug-in needed.

Everyone Can Join. Large meetings are no problem. Each attendee shows up in a list where microphones, webcams* and other presenter controls can be assigned with a single click.

Click to Meet. Our simple, browser-based interface lets you can focus on better meetings. A single click starts it all.

has invited you to a Dimdim Web Meeting for PM EST. To join the web meeting, simply click [here](#).*

Multiple Personalities. Dimdim is as diverse as you are. Customize your private meeting rooms*. Host or join meetings on Mac, Windows & Linux.

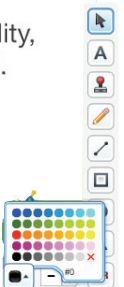

Integration Built Right In. Public, open APIs ensure Dimdim is extended easily. Popular CRM and LMS integrations are already available. Dimdim easily integrates with iCal, Outlook and IM clients.

World Class Access and Control. Dimdim provides best-in-class reliability, scalability, flexibility and security. Rest easy, we don't store any of your information in the cloud.

Multi-user Everything. All attendees can simultaneously annotate a presentation, mark up a whiteboard, send instant messages and broadcast their audio and video.* Hosts can enable any attendee to take control of the meeting to share their PowerPoints, PDFs, whiteboards, even share their desktops.

Open Roadmap. Dimdim shares what we're working on so you can help. Expect amazing recording and playback controls, multiple presenter workflows, and cool widgets.
